CAREER GOALS

My goal is to become an excellent Senior Web Developer, contributing to building high-quality web applications that meet customer needs and at the same time develop a career in the information technology field. I want to participate in complex projects, from designing interfaces to building backend systems, to creating effective web applications and good user experiences.

SKILLS

PROGRAMMING

- Use programming languages to study and work such as java, javascript, php, python, c#.

SOFTWARE DEVELOPMENT

- Software development: Experience in developing web applications and mobile applications using frameworks such as react, asp.net, php, android studio, node.js.

DATABASE DESIGN

- Understanding of relational and non-relational database design, experience working with MySQL, MongoDB, Sql.
